TO WHOM IT MAY CONCERN

Dear Sir/ Ma,

RECOMMENDATION FOR MR. IKE-NJOKU DAVID

It is with pleasure that I am making this recommendation for Mr. Ike-Njoku, David (Reg. No: 20151021983) as regards his academic performance and overall rating in the Department of Agricultural and Bioresources Engineering, School of Engineering and Engineering Technology, Federal University of Technology Owerri, Imo State. He graduated in 2021 with a second-class lower degree, majoring in Soil and Water Engineering Option.

I have known Mr. Ike-Njoku for over eight (8) years as my student (2015-2024) and as his academic advisor. I taught him quite a number of courses of which include decision support systems, hydraulics, soil mechanics and behavior, seminar/technical report writing and some other departmental courses. I must attest to the fact that he showed a wide knowledge of the courses and performed his best in all of them.

Mr. Ike-Njoku is a dedicated and committed individual, and he commands a good use of English language as he communicates efficiently and writes effectively as well. He is matured, good mannered, competent and target driven and is currently in collaboration with the Department in developing machine learning models for identification of pests/diseases that affect plants based on image analysis. I can assure you that your accepting him will be a positive addition to your institution. Please accord him the necessary privileges.

Thank you.

Engr. Dr. O.O. Okorafor

Ag. HOD, ABE
